| LOCATION OF MEETING: | Office of the Chancellor  
                        Glenn S. Dumke Auditorium  
                        401 Golden Shore  
                        Long Beach, California, 90802 |

**PROPOSED PROJECT:**
California State University  
San Diego State University  
Engineering and Interdisciplinary Sciences Building Project

**PROPOSED ACTION:**
Adoption of Mitigated Negative Declaration/Initial Study; and Approval of Proposed Project

**APPLICANT:**
California State University  
San Diego State University  
Facilities Planning, Design and Construction  
5500 Campanile Drive  
San Diego, California 92182

**PROJECT MANAGER:**
Laura V. Shinn  
Director, Facilities Planning, Design and Construction  
San Diego State University  
lshinn@mail.sdsu.edu  
(619) 594-6619

The Board of Trustees of California State University, Committee on Campus Planning, Building and Grounds, will hold a public meeting to consider approval of the proposed San Diego State University (SDSU) Engineering and Interdisciplinary Sciences Building project, and the related adoption of the Mitigated Negative Declaration/Initial Study prepared for the project (SCH No. 2015021076; February 2015), on May 19, 2015, at 2:00 p.m. at the Office of the Chancellor, Glenn S. Dumke Auditorium, 401 Golden Shore, Long Beach, California, 90802. The public comment period, including issuance of a Notice of Intent to adopt the Mitigated Negative Declaration/Initial Study, was previously held between February 24 and March 25, 2015. The Mitigated Negative Declaration/Initial Study and other information related to the project are available for review online at SDSU’s website at [www.sdsu.edu/eis](http://www.sdsu.edu/eis).
The Proposed Project is the construction of a new, five-story instructional building (four levels above grade and one subterranean level) on the main campus of SDSU. The new building, which would be referred to as the “Engineering and Interdisciplinary Sciences Building,” will include teaching and research laboratory space and will provide SDSU with state-of-the-art research facilities to attract significant research projects and funding. The need for the new building stems from outdated facilities and growth in enrollment in the engineering disciplines. The new building would be located to the south of the existing Engineering Building, and would replace the existing Engineering Labs and Industrial Technology buildings.

Development of the Proposed Project includes demolition of the existing Engineering Lab and Industrial Technology buildings (approximately 47,000 gross square feet (GSF)), followed by construction of the new building, which would be approximately 95,000 GSF. The Proposed Project also includes modifications to the existing Engineering Building to connect the existing building to the new building on one or more floors. The new building would include a landscaped quadrangle for the science, technology, engineering, and mathematics (STEM) disciplines. Once the new building is completed, the Proposed Project also includes demolition of the existing CAM Labs and Quonset Hut/Facilities Services buildings, which are located to the north of the existing Engineering Building and would no longer be necessary.

No action or proceeding may be brought under the California Environmental Quality Act to challenge the Board’s adoption of the Mitigated Negative Declaration/Initial Study, unless the alleged grounds for non-compliance were presented to California State University/SDSU during the public comment period or prior to issuance of the Notice of Determination.
