Alvord Unified School District
San Diego State University Convening

November 17-18, 2014

An ongoing effort has been made to promote college and career readiness and college completion throughout Riverside County. Alvord Unified School District has been a part of this initiative, Completion Counts, and has continued the commitment after the grant funds were exhausted.

The following goals are instrumental in our efforts to prepare Alvord Unified School District (AUSD) graduates to be college and career ready:

- Based on FAFSA Pilot participation, 58 per cent of the class of 2014 students completed FAFSA.
  - Our goal is to increase to 100 per cent.
- Based on self-reported data to date, approximately 40 per cent of AUSD senior students submit college applications
  - Our goal is to increase this by a minimum of fifty per cent.
- Based on self-reported data to date, approximately 40 percent of AUSD students complete an average of one college application.
  - Our goal is to have all AUSD seniors complete an average of two college applications—more than a 100 per cent increase.
- Based on 2014 published community college data, 96 per cent of students require remediation.
  - Our goal is to reduce the percentage of students needing remediation by 50 per cent.
- Based on National Student Clearinghouse/Student Tracker System, 58 per cent of our class of 2013 students enrolled in postsecondary institutions.
  - Our goal is to increase this by 80 per cent.

Public review, announcement and affirmation of these goals are expected to take place once the governing board has approved the goals. More details regarding public announcements may become available after the San Diego State University and Alvord Unified School District Partnership Convening on November 17-18, 2015.
