

Journals of Interest - Mathematics and Science Education

December 2016

TABLE OF CONTENTS

Journal.....	Page
Educational Researcher.....	2
Volume 45, Issue 9	2
Educational Studies of Mathematics.....	3
Volume 94, Issue 1, Pgs 1-116	3
Mathematical Thinking and Learning.....	4
Volume 19, Issue 1	4
Journal of Research in Science Teaching.....	5
Volume 53, Issue 10	5
International Journal of Science Education.....	6
Volume 38, Issue 15	6
Volume 38, Issue 16	7
Volume 38, Issue 17	8
Science Education.....	9
Volume 101, Issue 1	9
Journal of College Science Teaching.....	10
Volume 46, Issue 3	10
International Journal of Mathematical Education in Science and Technology.....	12
Volume 48, Issue 1	12
Volume 48, Issue 2	14
Volume 48, Issue 3	16
The Journal of Mathematical Behavior.....	18
Volume 44, Pgs 1-76	18
Journal for Research in Mathematics Education.....	19
Volume 48, Issue 1	19
Journal of Stem Teacher (Online).....	20
Journal of Mathematics Teacher Education.....	21
Volume 19, Issue 6	21
Educational Psychologist.....	22
Volume 52, Issue 1	22
Educational Psychology Review.....	23
Volume 28, Issue 3	23

Educational Researcher

Volume 45, Issue 9

Feature Articles

Refugee Education

The Crossroads of Globalization

Sarah Dryden-Peterson

First Published December 22, 2016; pp. 473–482

Fostering Political Interest Among Youth During the 2012 Presidential Election

Instructional Opportunities and Challenges in a Swing State

Brett L. M. Levy, Benjamin G. Solomon, Lauren Collet-Gildard

First Published December 22, 2016; pp. 483–495

Assistance or Obstacle? The Impact of Different Levels of English Developmental Education on Underprepared Students in Community Colleges

Di Xu

First Published December 5, 2016; pp. 496–507

Reviews/Essays

Examining Racial Bias in Education

A New Approach

Natasha Warikoo, Stacey Sinclair, Jessica Fei, Drew Jacoby-Senghor

First Published December 22, 2016; pp. 508–514

Educational Studies of Mathematics

[Volume 94, Issue 1 Pages 1-116](#)

Editorial

Merrilyn Goos

Interactions between defining, explaining and classifying: the case of increasing and decreasing sequences

Lara Alcock, Adrian Simpson

Agency and assemblage in pattern generalisation: a materialist approach to learning

Francesca Ferrara, Giulia Ferrari

Comparative analysis on the nature of proof to be taught in geometry: the cases of French and Japanese lower secondary schools

Takeshi Miyakawa

Mathematics education in Lebanon: gender differences in attitudes and achievement

Ketty M. Sarouhim, Madona Chartouny

The association of precollege use of calculators with student performance in college calculus

Yi Mao, Tyreke White, Philip M. Sadler

A study regarding the spontaneous use of geometric shapes in young children's drawings

José Domingo Villarroel, Olga Sanz Ortega

Rupture or continuity: The arithmetico-algebraic thinking as an alternative in a modelling process in a paper and pencil and technology environment

Fernando Hitt, Mireille Saboya, Carlos Cortés Zavala

Mathematical Thinking and Learning

[Volume 19, Issue 1](#)

The State of Proof in Finnish and Swedish Mathematics Textbooks—Capturing Differences in Approaches to Upper-Secondary Integral Calculus

Andreas Bergwall & Kirsti Hemmi

The Prevalence and Disadvantage of Min-Counting in Seventh Grade: Problems with Confidence As Well As Accuracy?

Sarah Hopkins & Donna Bayliss

Attributes of Instances of Student Mathematical Thinking that Are Worth Building on in Whole-Class Discussion

Laura R. Van Zoest, Shari L. Stockero, Keith R. Leatham, Blake E. Peterson, Naphthalin A. Atanga & Mary A. Ochieng

Relation of Spatial Skills to Calculus Proficiency: A Brief Report

Jennifer G. Cromley, Julie L. Booth, Theodore W. Wills, Briana L. Chang, Nhi Tran, Michael Madeja, Thomas F. Shipley & William Zahner

Journal of Research in Science Teaching

[Volume 53, Issue 10](#)

A learning progression should address regression: Insights from developing non-linear reasoning in ecology (pages 1447–1470)

Tasos Hovardas

Version of Record online: 2 JUN 2016 | DOI: 10.1002/tea.21330

Developing a learning progression for sea level rise, a major impact of climate change (pages 1471–1499)

Wayne Breslyn, J. Randy McGinnis, R. Christopher McDonald and Emily Hestness

Version of Record online: 16 JUN 2016 | DOI: 10.1002/tea.21333

The impact of video case content on preservice elementary teachers' decision-making and conceptions of effective science teaching (pages 1500–1523)

Joanne K. Olson, Crystal N. Bruxvoort and Andrea J. Vande Haar

Version of Record online: 5 AUG 2016 | DOI: 10.1002/tea.21335

Early elementary students' understanding of complex ecosystems: A learning progression approach (pages 1524–1545)

Hayat Hokayem and Amelia Wenk Gotwals

Version of Record online: 17 JUN 2016 | DOI: 10.1002/tea.21336

Awakening a dialogue: A critical race theory analysis of U. S. nature of science research from 1967 to 2013 (pages 1546–1570)

Leon Walls

Version of Record online: 6 JUL 2015 | DOI: 10.1002/tea.21266

Developing interpretive power in science teaching (pages 1571–1600)

Ann S. Rosebery, Beth Warren and Eli Tucker-Raymond

Version of Record online: 25 AUG 2015 | DOI: 10.1002/tea.21267

International Journal of Science Education

[Volume 38. Issue 15](#)

**Do sophisticated epistemic beliefs predict meaningful learning?
Findings from a structural equation model of undergraduate
biology learning**

Silvia Wen-Yu Lee, Jyh-Chong Liang & Chin-Chung Tsai

Pages: 2327-2345

STEM in England: meanings and motivations in the policy arena

Vicky Wong, Justin Dillon & Heather King

Pages: 2346-2366

Learning experimentation through science fairs

Jürgen Paul, Norman G. Lederman & Jorge Groß

Pages: 2367-2387

**Developing the ability to recontextualise cellular respiration: an
explorative study in recontextualising biological concepts**

Menno Wierdsma, Kerst Th. Boersma, Marie-Christine Knippels & Bert van Oers

Pages: 2388-2413

**Scientist role models in the classroom: how important is
gender matching?**

Laura D. Carsten Conner & Jennifer Danielson

Pages: 2414-2430

[Volume 38. Issue 16](#)

Dimensions of science capital: exploring its potential for understanding students' science participation

Jennifer DeWitt, Louise Archer & Ada Mau

Pages: 2431-2449

Development, validation, and factorial comparison of the McGill Self-Efficacy of Learners For Inquiry Engagement (McSELFIE) survey in natural science disciplines

Ahmed Ibrahim, Mark W. Aulls & Bruce M. Shore

Pages: 2450-2476

Alternate text types and student outcomes: an experiment comparing traditional textbooks and more epistemologically considerate texts

Matthew Kloser

Pages: 2477-2499

Developing biology teachers' pedagogical content knowledge through learning study: the case of teaching human evolution

Paulina Bravo & Hernán Cofré

Pages: 2500-2527

Unintended knowledge learnt in primary science practical lessons

Jisun Park, Ian Abrahams & Jinwoong Song

Pages: 2528-2549

Volume 38. Issue 17

The dimensions and impact of informal science learning experiences on middle schoolers' attitudes and abilities in science

Pei-Yi Lin & Christian D. Schunn

Pages: 2551-2572

Information literacy in science writing: how students find, identify, and use scientific literature

Kristin M. Klucsevsek & Allison B. Brungard

Pages: 2573-2595

Curating blood: how students' and researchers' drawings bring potential phenomena to light

D. B. Hay & S. Pitchford

Pages: 2596-2620

The pedagogical potential of drawing and writing in a primary science multimodal unit

Rachel E. Wilson & Leslie U. Bradbury

Pages: 2621-2641

Effects of biology teachers' professional knowledge and cognitive activation on students' achievement

Christian Förtsch, Sonja Werner, Lena von Kotzebue & Birgit J. Neuhaus

Pages: 2642-2666

Science Education

[Volume 101. Issue 1](#)

Issue Information (pages 1–4)

Version of Record online: 14 DEC 2016 | DOI: 10.1002/sce.21262

Messages in a Bottles: Valuable Insights from and by Researchers (pages 5–7)

SHERRY A. SOUTHERLAND and JOHN SETTLAGE

Version of Record online: 14 DEC 2016 | DOI: 10.1002/sce.21261

Styles of Scientific Reasoning: A Cultural Rationale for Science Education? (pages 8–31)

PER KIND and JONATHAN OSBORNE

Version of Record online: 28 SEP 2016 | DOI: 10.1002/sce.21251

Development and Validation of the Learning Progression–Based Assessment of Modern Genetics in a High School Context (pages 32–65)

AMBER TODD, WILLIAM L. ROMINE and KATAHDIN COOK WHITT

Version of Record online: 27 NOV 2016 | DOI: 10.1002/sce.21252

Investigating Purposeful Science Curriculum Adaptation as a Strategy to Improve Teaching and Learning (pages 66–98)

ANGELA HAYDEL DEBARGER, WILLIAM R. PENUEL, SAVITHA MOORTHY, YVES BEAUVINEAU, CATHLEEN A. KENNEDY and CHRISTY KIM BOSCARDIN

Version of Record online: 31 AUG 2016 | DOI: 10.1002/sce.21249

The Knowledge and Practices of High School Science Teachers in Pursuit of Cultural Responsiveness (pages 99–133)

JULIE C. BROWN and KENT J. CRIPPEN

Version of Record online: 26 AUG 2016 | DOI: 10.1002/sce.21250

Tensions Teaching Science for Equity: Lessons Learned From the Case of Ms. Dawson (pages 134–164)

MELISSA BRAATEN and MANALI SHETH

Version of Record online: 27 NOV 2016 | DOI: 10.1002/sce.21254

Unpacking Sensemaking (pages 165–198)

SHULAMIT KAPON

Version of Record online: 4 SEP 2016 | DOI: 10.1002/sce.21248

Journal of College Science Teaching

[Volume 46. Issue 3](#)

What Makes Us Who We Are? Investigating the Chemistry Behind Genetics in an Interdisciplinary Course for Undergraduate Students

By: Amy Flanagan Johnson and Chiron W. Graves

Digital Badges in Science: A Novel Approach to the Assessment of Student Learning

By: Sarah Hensiek, Brittlund K. DeKorver, Cynthia J. Harwood, Jason Fish, Kevin O'Shea, and Marcy Towns

A Discipline-Specific Approach to the History of U.S. Science Education

By: Valerie K. Otero and David E. Meltzer

Implementation of Peer-Reviewed Homework Assignments

By: Richard N. Zare

Sesame Street Picnic: An Introductory Activity to Claims, Evidence, and Rationale

By: Dawn Del Carlo and Brittany Flokstra

Research and Teaching: Using a Practical Instructional Development Process to Show That Integrating Lab and Active Learning Benefits Undergraduate Analytical Chemistry

By: Robyn E. Goacher, Cynthia M. Kline, Alexis Targus, and Paul J. Vermette

Research and Teaching: Using Models From the Literature and Iterative Feedback to Teach Students to Construct Effective Data Figures for Poster Presentations

By: Christine E. Gray and Veronica E. Contreras-Shannon

Research and Teaching: Virtually the Same: A Comparison of STEM Students' Content Knowledge, Course Performance, and Motivation to Learn in Virtual and Face-to-Face Introductory Biology Laboratories

By: Amber J. Reece and Malcolm B. Butler

Research and Teaching: Measuring Student Interactions Using Networks: Insights Into the Learning Community of a Large Active Learning Course

By: Cynthia Buchenroth-Martin, Trevor DiMartino, and Andrew P. Martin

Point of View: Science Classrooms as a Gateway to Comprehensive Pedagogy

By: Nicolette L. Cagle

Two-Year Community: Using Formative Assessment to Improve Microscope Skills Among Urban Community College General Biology I Lab Students

By: Charles Keller

Case Study: Let's Get Personal: Putting Personality Into Your Cases

By: Clyde Freeman Herreid

International Journal of Mathematical Education in Science and Technology

[Volume 48. Issue 1](#)

Problem solving in the borderland between mathematics and physics

Jens Højgaard Jensen, Martin Niss & Uffe Thomas Jankvist

Pages: 1-15

Cause-effect analysis: improvement of a first year engineering students' calculus teaching model

Quay van der Hoff & Ansie Harding

Pages: 16-30

Subject design and factors affecting achievement in mathematics for biomedical science

Steven Carnie & Anthony Morphett

Pages: 31-47

Students' challenges with polar functions: covariational reasoning and plotting in the polar coordinate system

Samer Habre

Pages: 48-66

A case study of pedagogy of mathematics support tutors without a background in mathematics education

Richard Walsh

Pages: 67-82

Teachers' understanding of inflation: developing a crystalline concept

Sarah Bansilal

Pages: 83-93

Approximations first: a closer look at applications of the definite integral

Keith Brandt

Pages: 94-101

A generalization of generalized Fibonacci and generalized Pell numbers

W.M. Abd-Elhameed & N.A. Zeyada

Pages: 102-107

Linear algebra-based solution of the gambler's ruin problem

Greg Orosi

Pages: 107-111

On arithmetic-geometric-mean polynomials

Martin Griffiths & Des MacHale

Pages: 111-117

Cannibalism and chaos in the classroom

Gavin M Abernethy & Mark McCartney

Pages: 117-129

Unique factorization and the fundamental theorem of arithmetic

David Sprows

Pages: 130-131

A generalization of the spherical inversion

José L. Ramírez & Gustavo N. Rubiano

Pages: 132-149

Dynamic investigation of triangles inscribed in a circle, which tend to an equilateral triangle

Moshe Stupel, Victor Oxman & Avi Sigler

Pages: 149-161

[Volume 48. Issue 2](#)

Pre-service teachers' free and structured mathematical problem posing

Steven Silber & Jinfa Cai

Pages: 163-184

Using a virtual population to authentically teach epidemiology and biostatistics

Peter K. Dunn, Sharn Donnison, Rachel Cole & Michael Bulmer

Pages: 185-201

Implementing a flipped instructional model in college algebra: profiles of student activity

Kristin Lesseig & Paul Krouss

Pages: 202-214

Applying an alternative mathematics pedagogy for students with weak mathematics: meta-analysis of alternative pedagogies

Warren Lake, Margie Wallin, Geoff Woolcott, Wendy Boyd, Alan Foster, Christos Markopoulos & William Boyd

Pages: 215-228

How useful are closed captions for learning mathematics via online video?

Chris Tisdell & Birgit Loch

Pages: 229-243

Towards a framework for developing students' fraction proficiency

Tsung-Lung Tsai & Hui-Chuan Li

Pages: 244-255

Generalization of the Bernoulli ODE

Douglas Azevedo & Michele C. Valentino

Pages: 256-260

An explanatory, transformation geometry proof of a classic treasure-hunt problem and its generalization

Michael de Villiers

Pages: 260-267

Polynomial interpolation and sums of powers of integers

José Luis Cereceda

Pages: 267-277

Students' confusions with reciprocal and inverse functions

Igor' Kontorovich

Pages: 278-284

Intersection of three planes revisited – an algebraic approach

Götz Trenkler & Dietrich Trenkler

Pages: 285-289

Tornado-shaped curves

Sol Sáez Martínez, Félix Martínez de la Rosa & Sergio Rojas

Pages: 289-300

A different perspective of the teaching philosophy of RL Moore

Stephen L. Jones

Pages: 300-306

Symmetry and the golden ratio in the analysis of a regular pentagon

Amelia Carolina Sparavigna & Mauro Maria Baldi

Pages: 306-316

Origami, geometry and art

Arsalan Wares & Iwan Elstak

Pages: 317-324

[Volume 48. Issue 3](#)

Some environmental and attitudinal characteristics as predictors of mathematical creativity

Abhishek Kanhai & Bhoodev Singh

Pages: 327-337

Mathematical modelling and the learning trajectory: tools to support the teaching of linear algebra

Andrea Dorila Cárcamo Bahamonde, Josep Maria Fortuny Aymemí & Joan Vicenç Gómez i Urgellés

Pages: 338-352

Developing the roots of modelling conceptions: 'mathematical modelling is the life of the world'

Jill Patricia Brown & Gloria Ann Stillman

Pages: 353-373

Thematization of derivative schema in university students: nuances in constructing relations between a function's successive derivatives

Claudio Fuentealba, Gloria Sánchez-Matamoros, Edelmira Badillo & María Trigueros

Pages: 374-392

Introducing computational thinking through hands-on projects using R with applications to calculus, probability and data analysis

Nadia Benakli, Boyan Kostadinov, Ashwin Satyanarayana & Satyanand Singh

Pages: 393-427

Presenting the Straddle Lemma in an introductory Real Analysis course

A. Soares & A. L. dos Santos

Pages: 428-434

Visualization in mechanics: the dynamics of an unbalanced roller

Peter S. Cumber

Pages: 434-454

**Approximating exponential and logarithmic functions using
polynomial interpolation**

Sheldon P. Gordon & Yajun Yang

Pages: 455-473

**Fermat point for a triangle in three dimensions using the
taxicab metric**

J.R. Hanson

Pages: 473-482

The Journal of Mathematical Behavior

[Volume 44 Pages 1-76](#)

Opportunity to communicate: The coordination between focused and discerned aspects of the object of learning

Lucian Olteanu

Pages 1-12

Overcoming a 4th grader's challenges with working-memory via constructivist-based pedagogy and strategic scaffolds: Tia's solutions to challenging multiplicative tasks

Casey Hord, Ron Tzur, Yan Ping Xin, Luo Si, Rachel H. Kenney, Jerry Woodward

Pages 13-33

Improving calculus explanations through peer review

Daniel Lee Reinholz

Pages 34-49

Moving in and out of contexts in collaborative reasoning about equations

Elisabeth Rystedt, Ola Helenius, Cecilia Kilhamn

Pages 50-64

Why research on proof-oriented mathematical behavior should attend to the role of particular mathematical content

Paul Christian Dawkins, Shiv Smith Karunakaran

Pages 65-75

Journal for Research in Mathematics Education

[Volume 48. Issue 1](#)

Improving the Impact of Educational Research

Jinfa Cai, Anne Morris, Stephen Hwang, Charles Hohensee, Victoria Robison, and James Hiebert University of Delaware

Toward a Framework for Research Linking Equitable Teaching With the Standards for Mathematical Practice

Tonya Bartell, Michigan State University; Anita Wager, University of Wisconsin–Madison; Ann Edwards, Carnegie Foundation for the Advancement of Teaching; Dan Battey, Rutgers University; Mary Foote, Queens College; Joi Spencer, University of San Diego

Mathematical Thinking and Learning Through Robotics Play for Children With Critical Illness: The Case of Amelia

Megan Nickels, University of Central Florida; Craig J. Cullen, Illinois State University

Psychological Imprisonment or Intellectual Freedom? A Longitudinal Study of Contrasting School Mathematics Approaches and Their Impact on Adults' Lives

Jo Boaler, Stanford University; Sarah Kate Selling, University of Utah

Book Review: Reconsidering Affect in Mathematics Education

Reviewed by Amanda Jansen, Joseph DiNapoli, and Kristin McKenney, University of Delaware

Book Review: Roots and Sprouts: Cultivating Research on Mathematical Problem Posing

Reviewed by Edward A. Silver and Kwame Yankson, University of Michigan

Journal of Stem Teacher (Online)

(Current issue fall of 2016)

Journal of Mathematics Teacher Education

[Volume 19, Issue 6](#)

Examining mathematics teachers' conceptions, practices, and opportunities for change

Gwendolyn M. Lloyd

Examining and elaborating upon the nature of elementary prospective teachers' conceptions of partitive division with fractions

Amanda Jansen, Charles Hohensee

Developing understanding of mathematical modeling in secondary teacher preparation

Cynthia Oropesa Anhalt, Ricardo Cortez

Opportunities for learning given to prospective mathematics teachers: between ritual and explorative instruction

Einat Heyd-Metzuyanim, Michal Tabach

Sustainable changes in teacher practices: a longitudinal analysis of the classroom practices of high school mathematics teachers

Yasemin Copur-Gencturk, Anne Papakonstantinou

Educational Psychologist

[Volume 52, Issue 1](#)

Natural-Born Arguers: Teaching How to Make the Best of Our Reasoning Abilities

Hugo Mercier, Maarten Boudry, Fabio Paglieri & Emmanuel Trouche

Supporting Learners' Agentic Engagement With Feedback: A Systematic Review and a Taxonomy of Recipience Processes

Naomi E. Winstone, Robert A. Nash, Michael Parker & James Rowntree

Evaluating the Validity of Classroom Observations in the Head Start Designation Renewal System

Andrew J. Mashburn

How Instruction Influences Conceptual Development: Vygotsky's Theory Revisited

Marc Clarà

Educational Psychology Review

[Volume 28, Issue 4](#)

Remembering Gregg Schraw

Matthew T. McCrudden

The Structure of Ill-Structured (and Well-Structured) Problems Revisited

Stephen K. Reed

Eight Ways to Promote Generative Learning

Logan Fiorella, Richard E. Mayer

Teacher Enthusiasm: Reviewing and Redefining a Complex Construct

Melanie M. Keller, Anita Woolfolk Hoy, Thomas Goetz

A Meta-Analysis of the Relationship Between Learning Outcomes and Parental Involvement During Early Childhood Education and Early Elementary Education

Xin Ma, Jianping Shen, Huilan Y. Krenn, Shanshan Hu

The Future of Student Self-Assessment: a Review of Known Unknowns and Potential Directions

Ernesto Panadero, Gavin T. L. Brown, Jan-Willem Strijbos

Rethinking the Boundaries of Cognitive Load Theory in Complex Learning

Slava Kalyuga, Anne-Marie Singh

Spaced Retrieval Practice Increases College Students' Short- and Long-Term Retention of Mathematics Knowledge

Robin F. Hopkins, Keith B. Lyle, Jeff L. Hieb

An Interview with Richard E. Clark

Daniel H. Robinson, Robert A. Bligh
