The National Dual Language Consortium defines dual language programs for elementary school dual language programs, regardless of the population, as those that use the partner language (the language other than English) for at least 50% of the instructional day. This is the same definition used by California Department of Education (CDE) and Center for Applied Linguistics (CAL) to develop their directories. The number of dual language schools continues to grow.

NOTE: The schools on our San Diego dual language directory are self-reported. In addition, our dual language directory includes both two-way and one-way programs.
